Opening up Education in South Mediterranean Countries

Join us!

The **Morocco OER Strategy Forum** is a national seminar aimed at gathering together educators and managers from higher education institutions in Morocco, expected to provide opinions and inputs on the OER Agenda and local roadmap(s). In addition to Cadi Ayyad and Ibn Zohr universities, other public and private Moroccan universities, Higher Council for Education, Ministries of National and Higher Education, professional bodies in charge of Open Education, are invited to debate and review during this seminar experiences that exist locally or at national level.

During the event, participants are offered the opportunity to know more about the activities and first results of the OpenMed project, and to debate Open Education initiatives and strategies in an Euro-Mediterranean context. The participation to the event is free of charge. The working languages are French and English.

3' on Open Education

During the event participants are given the opportunity to say one's piece around openness in education. Participants are invited to video record 3-minutes statements, evidences, top advice, key challenges, and ideas about openness in education in the Arab Mediterranean Countries. "3' minutes on OE" is run by UCA and UNIR.

About OpenMed

The overarching goal of OpenMed is to raise awareness and facilitate the adoption of Open Educational Resources (OER) and Open Educational Practices (OEP) in the South Mediterranean region, with a particular focus on Egypt, Jordan, Morocco and Palestine.

OpenMed fosters the role of universities as knowledge providers not only to their on-campus students but also beyond the walls of institutions, especially towards disadvantaged groups (e.g. low-income peoples, disabled students, people living in rural areas, learners at risk of low achievement, refugees).
