Institutional Roadmap for Open Education

Institution	An-Najah National University
Country	Palestine
Contact	Saida Affouneh, Ahmed Noubani
Date	October 2018

Strategic Alignment

Links of this roadmap with the Institutional or Strategic Plan	The university strategic plan is concentrating on improving the quality of teaching and learning, developing the infastructure in order to meet the needs of quality serveices. Providing high quality wireless internet services, full coverage and safe access. Developing the facilities, equipment, communications systems, and computer center to fit the university's future developments in the field of technology. Adopting new policies for teaching. So the aim to develop more open resources is part of the university policies and stratgies.
Processes required for implementation	1. Capacity building in OER and OEP. 2. Licensing all produced open materials at A-Najah National University. 3. Advocacy at the decision making level.

OpenMed
Project n.: 561651-EPP-1-2015-1-IT-EPPKA2-CBHE-JP

Co-funded by the
Erasmus+ Programme
of the European Union

Relevant Actions

1	Open Pedagogy & Practice (P)
Actions to be developed	- Piloting the "Open Education: fundamentals and approaches" course inside the university. - Disseminate the "Open Education: fundamentals and approaches" course between other Palestinian universities. - Conduct workshops for Faculty members, students at our university and other Palestinian universities.
Description	Piloting the "Open Education: fundamentals and approaches" course inside our university to raise the awareness about OER and OEP to provide them with the main concepts and best practices. And organize a way to share it with other Palestinian universities in order to disseminate the culture of openness. Provide workshops in parallel with the course piloting to make sure that the process is achieving the course outcomes. Develop small projects from each group as an open resource.
Timeframe	3 years, starting in 2019
Prioroty (if applicable)	High
Expected results and impact	Building the skills required to start producing materials under OE Terms. Producing 5-10 OER projects.
People, teams or department in charge	OpenMed project team. Elearning center, Turin Week participants

2	Governance & business models (G)
Actions to be developed	- Meetings with the decision makers to discuss Open Licences - Participating in developing national policy
Description	Drafting a policy for licensing all OE materials (open courses, research…) by increasing the awareness at management level, professors and students about the importance of OE.
Timeframe	1 year
Prioroty (if applicable)	High

Expected results and impact	Decision makers aware of the advantages of the OE in enhancing the education process. A policy that covers all of the OE practices at the university level.
People, teams or department in charge	OpenMed project team, turin week participants, elearning center

3	**Open Content & Licenses (C)**
Actions to be developed	- Conduct training workshops about the types of open licenses and how to apply it to the produced materials. - Disseminating all licensed materials on our LMS.
Description	The workshop will be held twice a year to cover all of the university professors to train them about the open licensing.
Timeframe	3 years
Prioroty (if applicable)	High
Expected results and impact	Professotrs aware of how to use and apply open licenses. Redesign their applicable materials to license it. Gradually all material produced will be openly licensed.
People, teams or department in charge	Turin week trained participants, elearning center
